# Getting up and Running

**Edward Curren**

ENTERPRISE ARCHITECT

@EdwardCurren        http://www.edwardcurren.com

# Disclaimer

It took me a while to record this course, so there are some inconsistencies in the project structure that you might notice.  Don't worry about them.  Everything's okay.

# Overview

Tour of the environment

Install the database

Get to know the data

Install Ignite

Look at the web console

Create generate and download the base project
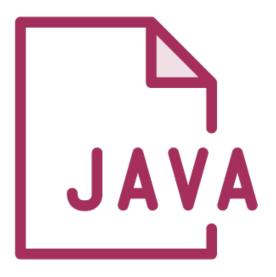

Look at the REST API

# The Cluster

Ignite One – Windows

Ignite Two – Windows

Ignite Three – Linux

Ignite Four – Linux
